

Rubber Ring

Thank you very much for choosing this product!

Please read the instructions fully before you assemble the equipment so you can enjoy the product and safety is guaranteed. We are happy to respond to your questions and requests.

Note!

This product is not a toy. It offers no protection from drowning. Suitable for users from 6 years old. Only to be used in deep water by experienced users (including adults). Please also be aware of the danger of sagging in the ring.

Pump the ring up with a steel needle (e.g. for footballs). Moisten the needle before pumping up. **Under no circumstances use a plastic needle.** Insert the valve needle vertically and guide it straight through the valve. Incorrect use can lead to damage to the valve or the tube.

Important!

The ring and the patch, into which the valve is integrated, are of different flexibility. For this reason, do not pump up the ring too much to avoid deformation of the patch or leaks.

Ring measurement	Maximum pressure
11 112 4200 Rubber Ring 55/33 cm	0.1 bar
11 112 4213 Rubber Ring 85/50 cm	0.07 bar
11 112 4239 Rubber Ring 140/46 cm	0.04 bar

Very important! Rinse the ring with clean tap water after use!
